Did the online complement (vle.upm.edu.ph) help? If yes, in what way? If not, where did it fail?

yes, it taught us how to make a website which is my first time to do. Yes. it easier to log on in your account but there is a small problem when the user is log on for too long! Yes. It was very convenient for me that most the needed materials are easily accessible in the online complement and I can easily see the course outline through it. Yes, it is helpful for me in the following ways: 1. No need for the participant to write down all the requirements/assignments. 2. Paper less, all the participants do is visit the site. 3. Not only confide in the IMS' office but is accessible as well in our ...

Would you recommend this course to others?

Yes	6	100%
No	0	0%

People may select more than one checkbox, so percentages may add up to more than 100%.

Who should attend this course?

Those who wants to learn and capable of learning this me again. and some of my fellow office staffs.. Faculty/Staff in-charge of information dissemination, maybe even members of student organizations (School Paper, Student Leaders) who are open to the idea of having their own website. Persons who are maintaining their respective offices' sites. All other Administrative Staff of UPM. This course should also be attended by chief/head of office

Please give your additional comments about the course.

I learn about web development planning but some topics are not explained well. Thank you :) maybe the course should have more time so we can slowly absorb every topic because all topics are very important !! It would

probably be better if notes regarding the use of Drupal could also be included in the online complement (vle.upm.edu.ph) such as common html references, and easy reference in case we forget how to do a simple task in Drupal. Also, it would help technically if there was a larger visual aid (working projector). I also suggest having an assistant course instructor to be responsible fo ...
